ok. this closely resembles something that we are going to do also. I think we will still implement what we are doing...but we can discuss next week.

Dawn based her memo on numbers in the ATSDR summary charts and ORC had asked me to verify where each of those had come from and the dates of the samples in filling in what we will need for the record...there was a table sent to Shawn on a Friday evening maybe from you or Ann? I'm just going to fill in the source and date. Cabot has implied we took values from a letter from their counsel that had units wrong

Karen, I am not sure who is asking for this. In my opinion, the results that we need to make sure we know specifically where they came from, are the ones that Dawn references in her tox opinion to recommend some action.

So...when I get a chance, I was going to ask Dawn to footnote her tox opinion (in her memo to me). Maybe I am missing something...if so, explain more.

The  well is on our list, but not high priority because nobody has been drinking it. We probably work this into the end of the sampling event.

Rich

I've been asked to add column(s) identifying where the same result came from (source) and the date for each. There are also a few corrections to the table regarding (J) v. non J values for the metals that were noted.

Thanks. If you can forward I'll get it updated this weekend.

Also did you ever get an agreement to sample the  well next to  there is just a well and "Shed" no residence, but the well had a bunch of stuff in it and  response from Cabot is the well is outside the area at their primary residence in Brooklyn, PA, but can't figure why they would have sampled outside the area of interest...just don't want to miss that well. Thanks!
